Dear students, a world waits for you with its beauty. You can change the world. Now you will observe the toughness of life and its struggles, but don't be afraid. You are the one who possesses the power to change the world. Always remember that a diamond can only be made out of coal when it survives all the pressure and heat in its life.

Memories have been part and parcel of my life, much like everyone else. We remember the good days which have gone by and the bad ones as well. One of the good memories in life is definitely of their school life. It is considered to be the best phase of their lives by many. A student knows the importance of school life, and they consider it the golden period of their life. And why should it not be? It is the first genuinely impactful thing in one's life, and the importance of it can never be disproved.

One full year was the only time I could spend in this school. From the first day till the last the only thing this school has given me is good memories, friends and wonderful teachers who have supported me every step of the way. From laughing with the teachers to them scolding me from my friends casually scolding me to making me laugh across the classroom from wishing the non-teaching staff good morning every day to them always making sure our classrooms are always cleaned before our arrival this school has truly given it all to me. Even though my time here was short it was precious. No amount of words can convey how grateful I am to this school for giving me the perfect high school experience. And as the sun shines bright, the birds sing their song, as we bid adieu to the year that's gone.
